EDUCATION

Master's in Computer Application

SASTRA UNIVERSITY

2016- 2019

SKILLS

- Team Player
- Technical Leadership
- Customer Relations
- Critical Thinking

TOOLS

- Git
- GitHub
- Jenkins
- Jira
- Rally
- NexusIQ
- Postman
- Sonarqube
- Swagger
- Claude, OpenAI

PROFILE

Frontend-focused engineer with 10+ years of experience building high-performance web applications across banking, transportation, and financial services. Expertise in React, Next.js, TypeScript, JavaScript, Node.js, and modern web architectures. Strong background in performance optimisation, reusable component systems, accessibility, analytics instrumentation, and user-centric product development. Experienced in collaborating with product, design, and engineering teams to deliver scalable digital experiences. Passionate about AI-assisted development, experimentation, and continuous improvement.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Angular, HTML5, CSS3, Redux Toolkit, Tailwind CSS, Material UI

Backend: Node.js, Express.js, Java, Spring Boot, REST APIs, GraphQL, PostgreSql

Performance: SSR, SSG, Lazy Loading, Code Splitting, Core Web Vitals, Responsive Design, Accessibility (WCAG)

Analytics & Product: Event Tracking, User Journey Analysis, Funnel Optimisation, Product Metrics, A/B Testing Concepts

Testing: Jest, React Testing Liabrary, Playwright, Cypress

Cloud & Architecture : Distributed Systems, Enterprise Architecture, Event-driven Architecture, Scalable Systems Design, Cloud-Native Principles

Practices :Agile, Technical Leadership, Code Reviews, Mentoring, Documentation, Knowledge Transfer

AI Tools: Claude Code, GitHub Copilot, OpenAI APIs

WORK EXPERIENCE

BNP Paribas Bank Oct 2021 - Jun 2026

Senior Software Developer

- Developed and maintained enterprise-grade React and TypeScript based applications supporting 5,000+ internal users.
- Built and integrated REST APIs supporting secure banking workflows and identity verification processes.
- Implemented National Card Reader integration for government ID authentication while adhering to EU security standards.
- Collaborated with architecture, security, and operations teams to deliver scalable enterprise solutions.(supported by enterprise environment experience)
- Participated in CI/CD delivery processes using Jenkins, Git, SonarQube and NexusIQ quality gates.
- Improved application performance by 40% through optimisation and code quality improvements.
- Leveraged AI-assisted development tools to improve productivity and delivery quality.

Belgium Rail (SNCB/NMBS) May 2020 - Sep 2021

Senior Software Developer

NMBS.jobs — Official Belgian Rail Recruitment Portal

- Built and maintained jobs.belgiantrain.be, the public recruitment site for Belgian Rail.
- Developed scalable interfaces with complex state management.
- Built reusable UI components aligned with NMBS design system.
- Improved accessibility, responsiveness, and rendering performance.

HDFC Bank May 2017 - Apr 2020

Senior Software Engineer / Team Lead

HDFC NetBanking (Login, Money Transfer, Deposits)

- Led frontend development across multiple banking products.
- Built 40+ reusable UI components, improving development velocity by 30%.
- Established coding standards and mentored engineers through code reviews.
- Improved performance, usability, and maintainability of customer-facing applications.

IDFC Bank May 2016 - Mar 2017

Developer / Production Support

SQL • Production Support • Root-Cause Analysis

- Provided production support for the IMPS application.
- Monitored application logs, identified errors, and implemented necessary patches.
- Troubleshot application performance issues.
- Worked with SQL databases and performed root-cause analysis of application failures.

PERSONAL PROJECTS

Personal Portfolio & Technical Blog

Next.js, TypeScript, Tailwind CSS

- Built a high-performance portfolio website using modern React and Next.js architecture.
- Implemented responsive design, SEO optimisation, and accessibility best practices.
- Improved Lighthouse performance and user experience metrics.

AI-Powered Developer Productivity Tools

OpenAI, Node.js, TypeScript

- Experimented with AI agents, prompt engineering, and automation workflows.
- Built tools to accelerate code generation, documentation, and development workflows.
- Applied AI-assisted engineering techniques to increase delivery speed and code quality.

CERTIFICATION

- Claude Code AI Agent Certification (2026)
- GitHub Copilot Professional Certification(2026)
