

Tejaswi Salvi

Senior Frontend / Full Stack Engineer

Senior Frontend / Full Stack Engineer with 10+ years of experience building scalable, enterprise-grade web applications across banking and financial services. Strong expertise in **React, TypeScript, JavaScript, Next.js, frontend architecture, reusable component systems, state management, and performance optimization.**

Experienced in taking features from technical design through implementation, testing, code review, and release while collaborating closely with Product, UX, backend, and DevOps teams. Strong full-stack and cloud-native knowledge across **Java, Node.js, REST, GraphQL, PostgreSQL, AWS, Docker, Kubernetes, Terraform, and CI/CD.**

Experienced technical lead with a strong focus on maintainability, reliability, scalability, user experience, engineering quality, and continuous improvement, with practical awareness of **AI-assisted software development and modern developer productivity workflows.**

CORE SKILLS

- **Frontend:** React , TypeScript , JavaScript , TanStack Query, Next.js , HTML5 , CSS3 , SASS/LESS , Tailwind CSS , Material UI
- **Backend & Cloud:** Java , Node.js , Spring Boot , REST APIs , GraphQL , PostgreSQL , SQL , AWS , Docker, Kubernetes, Terraform , Jenkins , CI/CD
- **Architecture & Engineering:** Frontend Architecture, NX Monorepo, Redux Toolkit , Redux ,React Hooks ,Reusable UI Components ,SPA Architecture,Performance Optimization,Accessibility/WCAG
- **Quality & AI:** Jest,React Testing Library, Playwright, SonarQube, Code Reviews,Automated Testing ,Generative AI ,AI-Assisted Development ,LLM-Based Development Workflows
- **Leadership:** Technical Leadership, Mentoring, Agile, Architecture & Technical Decision-Making

Work Experience

BNP Paribas Bank

Oct 2021 - Jun 2026

Easy Banking Employee Portal | Senior React / Full Stack Developer

- Enterprise web platform used by internal employees for **digital banking services, account management, and financial operations.**
- Designed and developed scalable user-facing applications using React, TypeScript, Next.js, and Redux Toolkit.
- Designed and evolved modern frontend architecture using reusable components, shared libraries.
- Built reusable UI components with **Tailwind CSS and Material UI**, improving consistency and development efficiency.
- Integrated REST and GraphQL APIs with Java Spring Boot backend services.
- Worked closely with backend, UX, Product, and DevOps teams to translate business requirements into intuitive and maintainable user experiences.
- Improved application performance through lazy loading, memoization, and code splitting.
- Contributed to frontend reliability, maintainability, and scalability through architecture discussions, code reviews, testing, and engineering best practices.
- Developed automated tests using **Jest, React Testing Library, and Playwright.**
- Containerized applications using Docker and supported deployments on Kubernetes.
- Collaborated with DevOps teams on **Jenkins CI/CD and AWS infrastructure.**

Education

JUNE 2019

SASTRA UNIVERSITY

Master of Computer
Applications

Skills

- Team Player
- Technical Leadership
- Customer Relations
- Critical Thinking

Tools

- Git
- GitHub
- Jenkins
- Jira
- Rally
- Postman
- Swagger

Languages

- English (Fluent)
- French (Beginner)

RECOGNITION

- Winning Together Award:
BNP Paribas Bank
- Service and Commitment
Award: HDFC Bank

- Participated in Agile ceremonies, technical discussions, code reviews, and mentoring of junior developers.
- Collaborated with Java/Spring Boot teams to deliver end-to-end features across frontend and backend services.
- Applied **AI-assisted development approaches** where appropriate to support code exploration, refactoring, testing, documentation, and developer productivity while maintaining code quality through review and automated testing.

Key Technologies: React, TypeScript, Next.js Redux Toolkit, Tailwind CSS, Material UI, GraphQL, Java, PostgreSQL, Docker, Kubernetes, AWS, Terraform, Jenkins, Playwright, Jest

Belgium Rail (SNCB/NMBS)

May 2020 - Sep 2021

Senior Web Developer

- Developed scalable frontend applications using React, TypeScript, and Redux.
- Built responsive and reusable interfaces using **Tailwind CSS**.
- Developed shared UI components to improve consistency and maintainability.
- Improved application **accessibility in line with WCAG principles**.
- Applied React optimization techniques to improve frontend performance.
- Collaborated with technical and business stakeholders to deliver application features.

HDFC Bank

May 2017 - Aug 2021

Senior Software Engineer / Team Lead

- **Led a team of four frontend developers**, providing technical direction and mentoring.
- Designed enterprise **Single Page Applications(SPA) using AngularJS**.
- Established coding standards and frontend development best practices.
- Designed and implemented reusable UI components.
- Worked closely with UX designers and Product Owners to deliver user-facing functionality.
- Identified and resolved frontend performance issues through application optimization.
- Contributed to technical decisions and maintained overall code quality.
- Supported delivery through **Agile development practices** and cross-functional collaboration.

IDFC Bank

May 2016 - April 2017

Developer / Production Support

- Provided production support for the IMPS application.
- Monitored application logs, identified errors, and implemented necessary patches.
- Troubleshooted frontend and application performance issues.
- Worked with SQL databases and performed root-cause analysis of application failures.
- Collaborated with development and support teams to resolve production issues and maintain application reliability.

Key Technologies: JavaScript, SQL, Web Technologies

SELECTED TECHNICAL IMPACT

- **Frontend Architecture:** Designed scalable React applications using modern component architecture and NX Monorepo.
- **Maintainability:** Migrated legacy applications toward modern React architecture, achieving a reported 40% improvement in maintainability.
- **Performance:** Applied lazy loading, memoization, code splitting, and React optimization techniques to improve application performance.
- **Reusable Engineering:** Built shared UI component libraries using Tailwind CSS and Material UI.
- **Quality:** Established coding standards, participated in code reviews, and implemented automated testing using Jest, React Testing Library, and Playwright.
- **Cloud & Delivery:** Worked with AWS, Docker, Kubernetes, Terraform, and Jenkins CI/CD to support cloud-native application delivery.
- **Technical Leadership:** Led a team of four frontend developers and mentored junior engineers.
- **AI-Assisted Development:** Familiar with applying generative AI and AI-assisted development approaches to accelerate code exploration, refactoring, testing, documentation, and problem-solving.
